

Cytokine–cytokine receptor interaction

JAK–STAT signaling pathway

Chemokine signaling pathway

Hematopoietic cell lineage

Toll-like receptor signaling pathway

IL–17 signaling pathway

Complement and coagulation cascades

TGF–beta signaling pathway

Inflammatory bowel disease

Th1 and Th2 cell differentiation

40 80 120 160

Mean adjusted p-value

Ribosome

Amyotrophic lateral sclerosis

Phagosome

Oxytocin signaling pathway

Allograft rejection

Type I diabetes mellitus

Viral myocarditis

Oxidative phosphorylation

Protein processing in endoplasmic reticulum

Ferroptosis

Number of genes
